

## Video virtual excursion

# Let's Get Started

All Subjects

Year 7

Stage 4

If this is your first time teaching with the From Paddock to Plate Schools Program, welcome! When planning your lessons, you may first like to read the Welcome Guide on our website.

[www.frompaddocktoplate.com.au/school-programs/](http://www.frompaddocktoplate.com.au/school-programs/)

## Assessing prior knowledge

Kick off by understanding the level of knowledge your students have of beef production in Australia. This will determine your structure of delivery.

- ASK the students to describe and list what they know about the production of beef in Australia.
- EXPLORE the useful words and phrases (page 3).
- BRAINSTORM and gather ideas, questions and information from the class and use this as a platform to begin this unit. What information do students want to confirm, check, debate or explore?
- DISCUSS the questions on the following page, or questions of students' own.

It is now a great time to watch the **From Paddock to Plate Beef Virtual Excursion**.

Learn all about beef. Where does it come from? How does it get to you? Louise FitzRoy talks to certified organic beef farmer, Warren Pansini of Blackwood Valley Organic Beef, Western Australia, about the full journey from paddock to plate.
